

> AEBSF

<i>cat. no.</i>	<i>amount</i>	<i>note</i>
STS-AEBSF 100	100mg	powder
STS-AEBSF 500	500mg	powder

AEBSF is a specific and irreversible inhibitor of serine proteases. AEBSF is an inhibitor of chymotrypsin, kallikrein, plasmin, thrombin, trypsin and other related thrombolytic enzymes.

AEBSF, powder
[4-(2-Aminoethyl)-benzenesulfonyl fluoride, HCl]

Formulation
 $C_8H_{10}FNO_2S-HCl$

Molecular Weight
239,7

Quality
Less toxic substitute for PMSF

Purity: >99,5%

Solubility
Soluble in water .

Storage
Store at 4°C. Following reconstitution, aliquot and freeze (-20°C). Stock solutions are stable for up to 6 months at -20°C.
