

> Ammonium Persulphate

<i>cat. no.</i>	<i>amount</i>	<i>note</i>
STS-APS 100	100g	powder
STS-APS 500	500g	powder

APS is a strong oxidizing agent and a radical inhibitor. StoS APS is used along with TEMED to catalyze the polymerization process in SDS-PAGE preparation.

Formulation

Molecular weight

228,2

Quality

Filtered; Electrophoresis-grade. High purity >98%

Chloride (Cl) <0.001%

Phosphate [PO₄] <0.01%

Heavy Metals <0.001%

Solubility

APS is soluble in water.

Storage

Store at Room Temperature.

FOR RESEARCH USE ONLY
