

> bis-Acrylamide, 2% Solution

Bisacrylamide (N,N'-Methylenebisacrylamide), 2% (w/v) solution

<i>cat. no.</i>	<i>amount</i>	<i>note</i>
STS-ACBIS 100	100ml	Filtered; Electrophoresis-grade.

Formulation

Molecular weight

154.17

Quality

Filtered; Electrophoresis-grade.

Bisacrylamide is the most frequently used crosslinking agent for polyacrylamide gels.

Solubility

Soluble in water.

Storage

Store at 4°C. Keep tightly sealed.
